## Run-down of Evacuation Procedures

Before an Earthquake 0ccurs

#### What You Should Do Beforehand

- Locate your home on the map printed on the other side of this
- Confirm the evacuation site location and what you should do.

#### Earth **Earthquake Early Warning** quake (Kinkyu Jishin Sokuho) Issuance

**Earthquake Early** Warning

Issues prompt alerts, such as the start of a large scale earthquake. Warnings are broadcast

### **Until Shaking Subsides**

#### At home/In a building

**Protect Yourself** Shelter under a solid table.

 Be careful to avoid falling furniture and other items.

#### Outdoors

- Stay away from concrete-block walls, vending machines and buildings.
- On buses or trains, hold on tightly to straps and handrails.
- If driving, turn on your hazard lights to alert other drivers, then gently slow down. Do not slam on the brakes or stop suddenly.

**Evacuation Sites**

in Kyoto City

**^** 

### **Evacuation Site**

#### **Designated Emergency Evacuation Site**

A facility where evacuees can stay temporarily until danger passes, or temporarily accommodate them in case they are unable to return home due to disaster

**Designated Refuge Area** An evacuation site to escape from fire danger. Which designated emergency evacuation site

As a general rule, use the designated emergency evacuation site in the school district of your residence (see the other side of this

Contact point for inquiries regarding designated refuge areas and designated emergency evacuation sites:

General Affairs Section, Community Power Promotion Office, Fushimi Ward Office

075-611-1295 General Affairs Section, Community Power Promotion Office, Fushimi Ward Fukakusa Branch Office 075-642-3125 General Affairs Section, Community Power Promotion Office, Fushimi Ward Daigo Branch Office

## ( First 5 Minutes

#### Once Shaking Has Stopped

#### **To Prevent Fires**

 Turn off the gas in the kitchen, heating devices, etc.

#### If a fire starts

Extinguish the fire with a fire extinguisher, etc. Loudly inform neighbors of the fire, and dial 119 (emergency number).

#### **Evacuation Preparations**

Make an exit path.

#### If you are trapped inside

Yell out in a loud voice, bang and make noise by striking nearby objects to let others know of your presence.

- Prepare Items to Bring in Emergency Situations.
- Turn off your circuit breaker to prevent a fire.
- Leave a written memo in a visible location near the entrance so others know where you have gone.

## ( 5 to 10 Minutes

**Standard Evacuation Procedure:** 

**Evacuation** 

**Local Temporary** 

**Designated Emergency** 

**X** If there is a threat of fire, temporarily evacuate to a **Designated Refuge Area**.

#### **Local Temporary Evacuation Point**

Local Temporary Evacuation Points are nearby locations where people gather after disasters to check on the safety of neighbors, learn the extent of damage, conduct small-scale firefighting duties, and obtain evacuation guidance.

Inquire at your nearest fire station for information about your area's Local Temporary Evacuation Point.

#### **Precautions**

- Travel on foot and take the minimum required materials
- Travel on wider streets/paths, and avoid potential hazards such as concrete-block walls, gate posts, and tall objects/structures which may fall.

#### **Upon Reaching the Local Temporary Evacuation Point**

Check the damage conditions and people's safety.

#### If somebody needs help

Help extinguish fires and help provide first aid. If dealing with the situation is difficult, call the fire department and/or police.

#### **After 10 Minutes** or Later

#### Arrival at Designated **Emergency Evacuation Site**

- Write your name and personal information on the evacuees list.
- Consult with evacuation shelter staff members if you have questions or are in a difficult condition.
- \*Designated Emergency **Evacuation Sites are** operated in cooperation with local residents.

#### **Until Outside Help Arrives**

- For daily necessities, use your own items brought to emergency situations before using shelter supplies.
- Do not enter any damaged or collapsed houses/buildings.
- Obtain accurate information, and be prepared for aftershocks.

## Regular Preparation

▶ Store those items in a backpack or similar carrying bag that leaves both hands free

The app is available in 14 languages.

https://www.rcsc.co.jp/safety

## **Measures to Protect Yourself from Falling Furniture and Other Items**

In recent years, 40 to 50% of earthquake-related injuries have been caused by falling furniture and other items.

- Minimize the amount of furniture in your bedroom.
- Do not place furniture near the entrances of any room.
- Do not place items on top of furniture. Place heavy items on lower shelves.

#### Furniture-falling Prevention Items

Cabinet door securing tool Prevent cabinet doors from opening so dishware and other items can't spill out.

Glass scattering prevention film Prevents glass from scattering by adhering films to windows, glass cabinet

doors, and the like.

It is important to correctly use furniture falling prevention tools in order to fix furniture and prevent glass breakage. Other furniture fixing items are available at general stores.

## **Useful Information** in Emergency Situations

### **Emergency Numbers**

Accidents (police)

If a phone is not available

Fire, emergency, 119

## **Disaster Emergency Message Dial (171)**

Disaster Emergency Message Dial (171) is activated to connect family members and friends via standard telephone, mobile phones or computer in the event of an earthquake.

- Delivering information about people in disaster-affected areas using audio recordings. ● Becomes available following disasters such as earthquake of lower 6 or greater on
- Accessible via standard phones, public phones and mobile phones.

## Consultations Regarding Disaster Prevention and Response

Use the Disaster Emergency Message Board (web171) to confirm personal safety.
